## Project Description

This \$90M was Phase 2 of the renovation and construction for the Jacksonville Jaguar football facility that VIA was a part of. This project constructed a new 5,500 person capacity amphitheater, 94,000 SF covered flex field and support buildings. The project consisted of auger cast piles and reinforced concrete substructures supporting a complex steel truss structure. In addition, a polytetrafluoroethylene fabric spanning 430' was suspended from the complex steel structure.
